Be Safe, Check Underground Gas Pipes

As your natural gas distributor, the City of Social Circle must make safety recommendations regarding underground natural gas piping. The City operates its gas system with an emphasis on safety. We are required to design, operate, and maintain our underground gas pipeline system in accordance with prescribed federal safety standards.

The gas department does not maintain the gas piping downstream of the gas meter. This is the responsibility of the customer who owns that piping. If the buried pipe is not properly maintained, it may be subject to corrosion - if the piping is metallic - or leakage. To ensure the continued safe and reliable operation of these lines, the buried piping should be checked periodically. You or the building owner should contact a licensed plumber or heating contractor to assist in locating and inspecting buried gas piping. If any unsafe condition is found, repairs must be made immediately. For more information, visit socialcirclega.gov or call City Hall at 770-464-2380. Please disregard this notice if you do not have buried piping beyond the gas meter.

This is a free service. Flags mark where cables are buried. Flag colors represent various types of buried lines. Red denotes electric power lines, cable, conduit, and lighting cables. Orange is for telecommunication, alarm, or signal lines, cable, or conduit. Yellow represents natural gas, oil, steam, petroleum or other gaseous or flammable materials.
